

GARDiS Software Integration

**Nedap ANPR  
Camera Integration**

4420-3026

## GARDiS Software Nedap ANPR Camera Integration

TDSi's GARDiS Software integrates with Nedap's Lumo ANPR Camera to identify a Key Holder's Car Number Plate information as Access Control Credentials which are in turn passed to an Access Control Unit to authorise access.

GARDiS ANPR Camera Integration uses Nedap's Lumo camera to capture vehicle and recognise vehicle number plate of various countries and regions in dim light environments. GARDiS Pro Software is used to associate Car Registration details with a Key Holder and once set up the camera acts as a WIEGAND Reader to identify Number Plates and pass information back to an Access Control Unit.

### At a Glance

- Use Car Number Plate information as Access Credentials
- Works alongside other keyholder credentials and access levels
- Numberplate ID's are used in the same way as standard credentials
- Full reporting on activity and usage
- Easy to configure with GARDiS Pro Software
- Full control over adding, updating and deleting permissions

### Nedap

**Nedap Identification Systems is part of Nedap N.V., headquartered in the Netherlands. Nedap designs and develops intelligent, sustainable technological solutions for themes that are relevant to the modern society. It is Nedap's ambition to offer "Technology that Matters".**

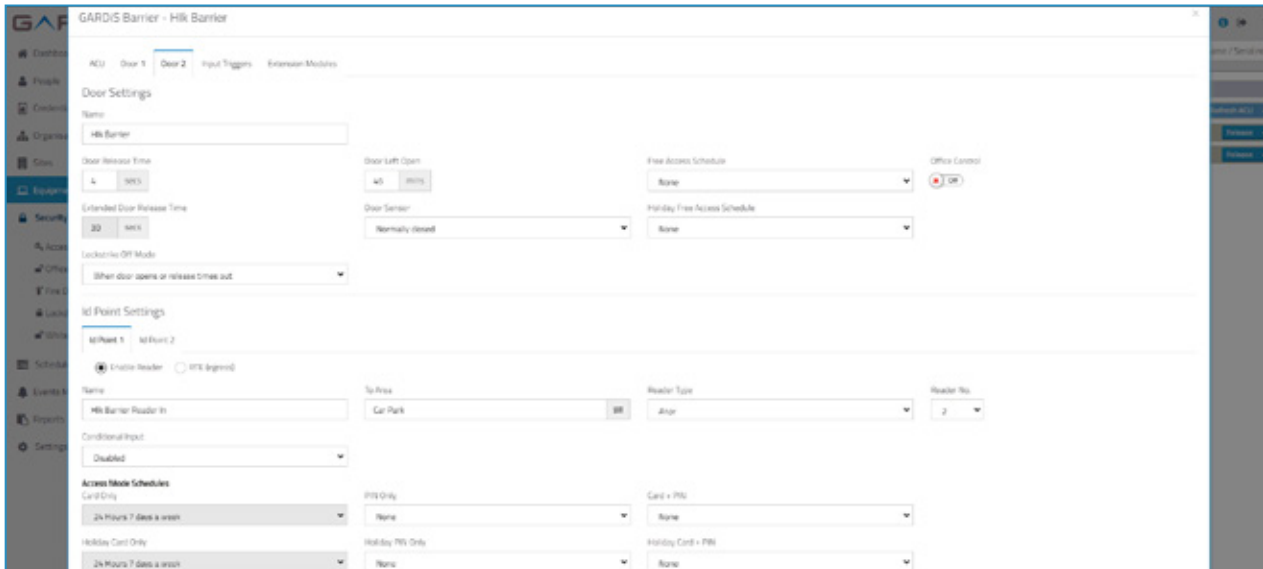

Since 1980, Nedap has been a leader in the design and manufacture of electronic access control systems, controlling access to any physical location that needs to stay secure – from businesses to government offices, hospitals, airports, schools, industrial sites and public venues.

Nedap was founded in 1929 in the Netherlands and has been listed on the Euronext stock exchange since 1949.

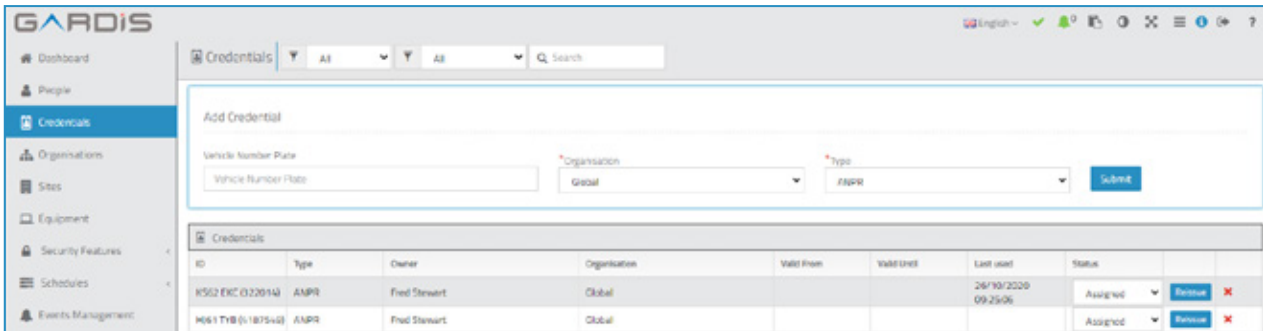

### About TDSi
