Gamanet C4 Integration

Gamanet's C4 Platform integrates with TDSi's GARDiS Software. This allows Gamanet C4 Software to receive information from a connected GARDiS Access Control Unit via TDSi's GARDiS REST API subject to the correct GARDiS Gamanet C4 Integration License and Gamanet C4 Software.

The integration allows for Gamanet C4 to link with GARDiS and import data to the Gamanet C4 Platform. When connected, Gamanet C4 imports Statuses, Events, Commands, Access Management (Credentials and Doors) from the GARDiS Platform and keeps this information up-to-date between platforms with automatic real-time synchronisation.

Gamanet C4 is a comprehensive Security Management Software designed to integrate and control various security systems within a single platform. It provides centralised management for video surveillance, access control, intrusion detection, fire alarm systems, and building automation. The software is highly scalable, allowing it to cater to different sizes of installations, from small businesses to large enterprises. Gamanet C4 features an intuitive user interface, real-time monitoring, advanced reporting, and customizable workflows, enhancing the efficiency and effectiveness of security operations.

At a Glance

- Connect TDSi GARDiS Access Control Units to Gamanet C4's Software Platform
- Real-time synchronisation automatically shares data and updates from GARDiS to Gamanet C4
- Automatic Status updates of GARDiS System, Controllers, Doors and Readers within Gamanet C4 Software
- Real-time Events displayed within Gamanet C4 Software from GARDiS System
- Increase business efficiency by avoiding data duplication

Please Note: This Gamanet C4 Software Integration with the GARDiS Access Control Software Platform also requires a subscription to the Gamanet C4 Software Platform which is available from Gamanet directly. For full integration functionality, please see Gamanet's GARDiS Integration Manual. Primary product support for the Gamanet C4 Platform is provided by Gamanet.

Gamanet

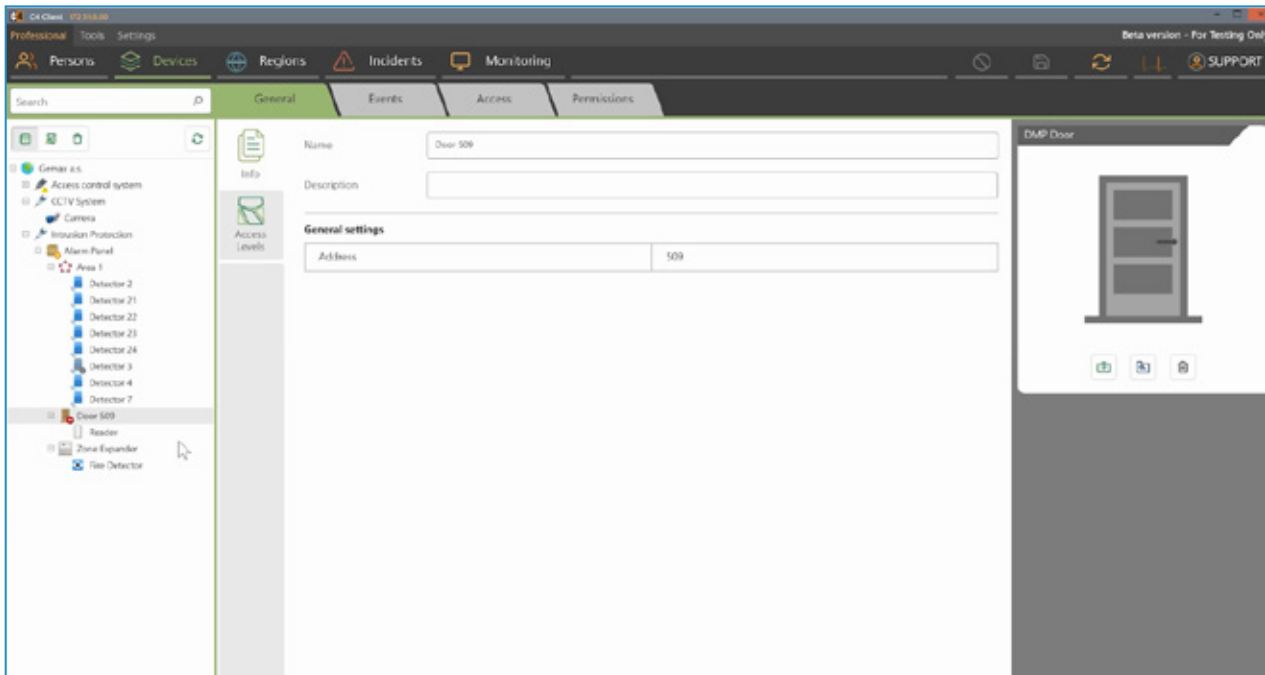

Gamanet A.S. was established in Slovakia in 2005 as a technology company focusing on Software development. They focus their activities on systems integration for physical security with a primary goal is to supplying top-class, timeless software solutions. Outside the established position in central Europe, they have direct representation in Eastern Europe, North America, South America, the Middle East, and Australia.

Gamanet C4 Software can cover all the needs of different market segments. Whether it is security of small facilities or big operations of various complexity, System C4 can satisfy all the needs of difficult projects and change the complicated world of security to simple and accessible.

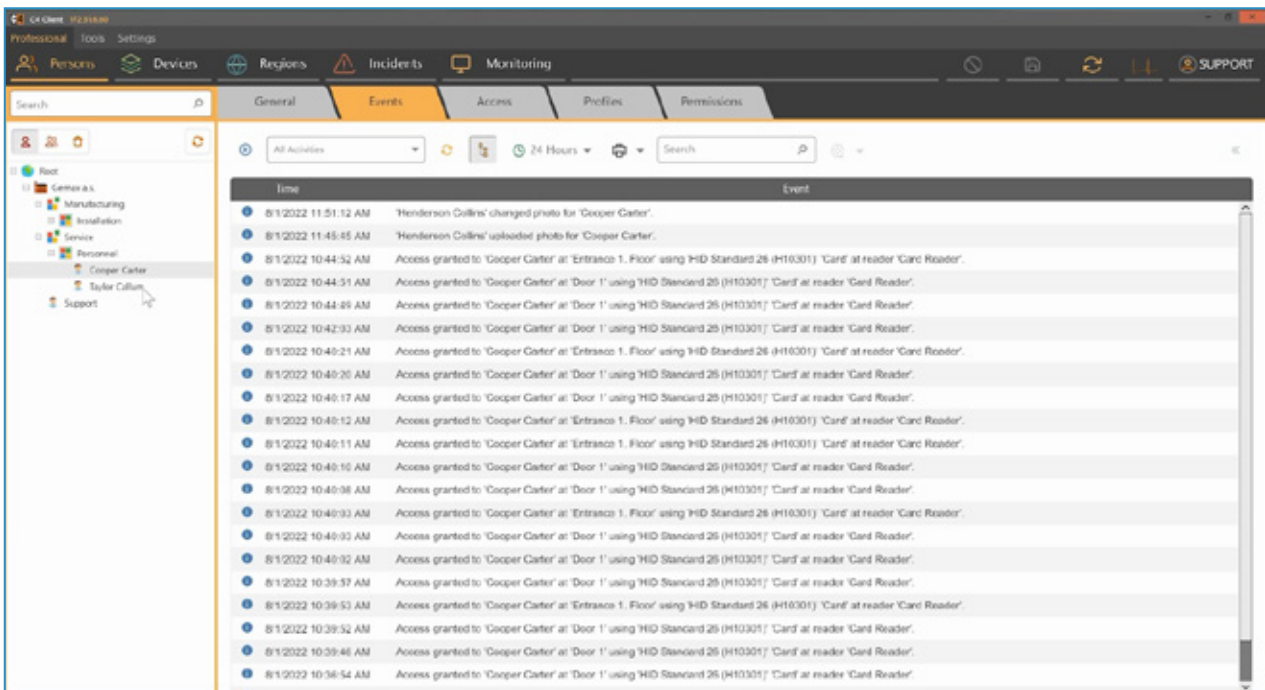

About TDSi

Robust and reliable Access Control Systems manufactured by world-renowned security specialists TDSi for the last 40 years.

Protecting and securing your building, assets, and people is a high priority for any business. However, those responsible for building security often find themselves overwhelmed by choice. TDSi is a specialist in access control, offering a range of superior products that not only answer the security challenges of the 21st century but delivers peace of mind to those who trust in our expertise and experience.
